Kellton

Improve savings and efficiency with Microsoft Azure

Optimize value and minimize cost by migrating your on-premises solutions to the cloud

Microsoft Solutions Partner	Microsoft Solutions Partner	Microsoft Solutions Partner
Digital & App Innovation Azure	Data & AI Azure	Infrastructure Azure

Managing aging hardware and paying for expensive on-premises licenses limits your ability to deliver on your business priorities. The cloud gives you access to hundreds of cloud services that require no infrastructure costs.

We Unite The Full Power Of Microsoft–Azure, Data & AI, Digital Applications, Microsoft 365 And More–With Kellton's Engineering Excellence To Unlock Enterprise Transformation.

Licensing savings	Budgeting and new resources	Extendible and scalable apps

Best-in-class cost and performance with Azure

Reduce costs by reusing your existing Windows Server and SQL Server licenses in Azure. You'll pay less for cloud infrastructure while improving performance. And with pay-as-you-go pricing, you'll save even more by only paying for the resources you use.

Windows Server on Azure to modernize your infrastructure

Azure VMware Solution to cost-efficiently extend your on-premises solutions

Azure Database for PostgreSQL to optimize resource usage

Linux on Azure to optimize costs with flexible licensing and savings options

58% cost savings when compared to an on-premises PostgreSQL database [1]

306% return on investment (ROI) over three years [2]

76% savings on workloads using Azure Hybrid Benefit for Linux [2]
